
Infection Control Training

Healthcare-associated infections (HAIs) are among the most common complications of healthcare services worldwide. These types of infections occur when a person seeks help for one illness or injury and during treatment at a healthcare facility acquires an unrelated illness that was not present at the time of admission. Infection prevention and control is a set of practices designed to limit or eliminate the transmission of infections in all healthcare settings.

Infection Control Training

All of us have gotten sick or dealt with an infection at some point in our lives. That is just considered part of daily life.

However, did you know one of the highest risk places to get an infection is at healthcare facilities such as hospitals, medical offices, dental offices, etc.?

Healthcare-associated infections (HAIs) are among the most common complications of healthcare services worldwide. These types of infections occur when a person seeks help for one illness or injury and during treatment at a healthcare facility acquires an unrelated illness that was not present at the time of admission. Common HAIs include: bloodstream infections, urinary tract infections, surgical site infections, pneumonia, etc.

Infection prevention and control is a set of practices designed to limit or eliminate the transmission of infections in all healthcare settings.

Does your organization have an infection control compliance program? All healthcare facilities should adopt infection control compliance programs to ensure that individual staff and the organization as a whole are adhering to industry standards governing infection prevention and control. These training and compliance programs help ensure that staff are informed about what HAIs are, the dangers associated with them, how they are transmitted, and how to prevent and eliminate them.

InfectionControlsTraining.com offers an online self-paced course to satisfy the training requirement for staff to be in compliance with an organization's infection prevention and control program.

This online training course is 4 hours long and is valid for all US states and territories including New York.

Audience:
Any individuals who work in healthcare
.....

Examples:
Physicians, Nurses, Physician Assistants, Dentists, Dental Hygienists, Medical Students, Hospitals, MidWives, Social Workers, Massage Therapists, Chiropractors, Physical Therapists, Surgeons, etc.

Online Infection Control Training

The online training is meant to handle the educational component and training requirement.

Rollout Our Smart Training to Your Workforce in 5 Minutes or Less

How? Our training system is smart - *very smart* - and does almost everything for you. All you have to do is to email generic instructions to your staff. It is the same instructions for everyone and we've already pre-typed the instructions for you.

Have staff that doesn't have email? No problem, print off the instructions and give it to them as a piece of paper.

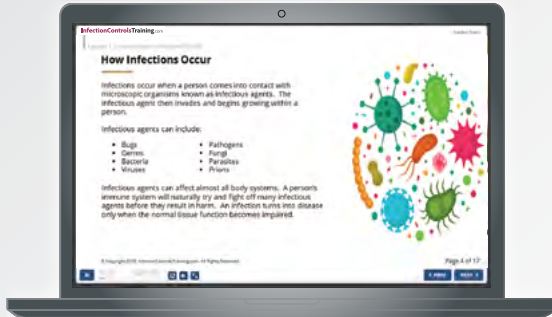

Once you provide the generic instructions to your staff you are done. The smart training system then takes over from there and trains, tests, generates certificates, emails you a copy of those certificates, and maintains a training log.

It can't get any easier.

- ✓ Our smart system utilizes a single shared multi-user login that eliminates the hassle of having to setup and manage multiple usernames and passwords.
- ✓ Everyone from your organization can log in from home or work (24x7) using the same shared login (no limit on simultaneous users).
- ✓ On passing the final exam, each individual is prompted to enter their name. The system then generates a PDF certificate for the individual and emails a copy of the certificate to the administrator for record keeping.
- ✓ The smart system maintains a detailed training log automatically for you.

The infection control course is **4 hours** long, self-paced, and generates a **2-year** certification upon completion.

Each employee receives their own certificate and wallet card immediately online upon successful completion of the training.

There are no contracts or minimums. Our training works like a phone card so you can just purchase as you need. We provide a cumulative discount over the life of the account so it always gets cheaper over time.

Pricing Per Course

Qty of Training Seats	Pricing Per Seat
1-9	\$29.99
